Appendix A

1.(Amended) A system for monitoring conditions within a tire comprising;

a sensor assembly disposed within each tire of a motor vehicle,

a transmitter in communication with said sensor assembly to transmit a frequency shift keyed transmission [signals] indicative of current tire conditions;

a remote transmitter for actuating a remote keyless entry system, said remote transmitter emitting a amplitude shift keyed transmission [signal] to actuate a function of said keyless entry system;

a receiver assembly for receiving said frequency shift keyed transmission signal indicative of said current tire conditions and said amplitude shift keyed transmission single to actuate a function from said remote transmitter [, said signal indicative of said tire conditions is different than said signal to actuate a function of said remote keyless entry system].
